

Spotfire® Enterprise

Unlock enterprise-grade visual data science

The Spotfire enhanced suite of packages is designed to meet the needs of the enterprise and the specific demands of their markets, enabling enterprises to unlock the full potential of their data, drive impactful decisions, and achieve a competitive advantage.

Notably, Spotfire® Enterprise and its add-ons empower organizations to automate, govern, and scale analytics across the enterprise. The visual data science platform is for enterprise organizations seeking to harness a culture of collaboration to drive enterprise-wide decision-making through the combination of interactive visualizations and advanced analytics at scale.

Spotfire Enterprise

Spotfire Enterprise is designed for large organizations looking to standardize their analytics operations across departments with centralized, automated analytics and a robust governance approach. Whether you are seeking to increase collaboration, enhance data governance, or automate time-consuming tasks, Spotfire Enterprise provides the tools you need:

Analysis sharing & collaboration

Drive better business outcomes by seamlessly integrating analytics into your workflows. Teams can easily access and explore analytics in real-time, breaking down data silos and fostering informed decision-making.

Security & governance

Ensure compliance with enterprise security standards using role-based access controls, data encryption, and audit logs. Governed data access ensures that users see only what they are authorized to view.

Automation capabilities

Automate routine data refreshes, generate reports, and trigger workflows based on specific events. Free up valuable time by reducing manual tasks and increasing operational efficiency.

Flexible integration

Connect Spotfire to your existing data ecosystem, whether it's on-premises or in the cloud. With broad support for

databases, data lakes, and APIs, Spotfire ensures seamless data integration.

Spotfire Enterprise offers a robust set of features designed to meet the needs of large organizations. By providing a scalable and reliable analytics platform, it supports everything from real-time data analysis to advanced predictive modeling.

Consolidate and streamline

Spotfire Enterprise consolidates and streamlines your visual data science landscape by replacing multiple legacy Spotfire licenses. By integrating capabilities previously available through multiple offerings, organizations can now benefit from simplified management and reduced operational complexity in one platform. Spotfire Enterprise replaces:

- Spotfire® Server
- Spotfire® Automation Services
- Spotfire® Statistics Services
- Spotfire® Consumer
- Spotfire® Qualification
- Spotfire® Network Analytics
- Spotfire® Statistica® Server and Modules

Elevate your experience

Spotfire continues to find ways to elevate your visual data science experience and capabilities, further enabling organizations to solve mission-critical business challenges

with ease and agility. Extend Spotfire Enterprise with our powerful add-ons.

Spotfire® Enterprise Advanced Data Services

For organizations dealing with complex data environments, Spotfire® Enterprise Advanced Data Services provides a seamless way to integrate, unify, manage, and transform data through a virtualized view of data from diverse sources. It extends the data access capabilities of Spotfire, enabling users to analyze data across multiple systems without replication:

- **Data virtualization:** Create unified views across disparate data sources without copying data, ensuring faster and more cost-effective analysis.
- **Data wrangling & transformation:** The Spotfire visual interface allows users to cleanse and prepare data directly within the platform, reducing reliance on external tools.
- **Data quality management:** Conduct data profiling and validation to ensure accurate, reliable insights.
- **Seamless integration:** Connect with databases, cloud platforms, and data lakes to unlock greater analytical potential.
- **Governance & security:** Maintain strict control over data access and ensure compliance with enterprise data policies.

Access the right data at the right time to make smarter, data-driven decisions that drive business growth in a secure and governed environment with the Spotfire® Enterprise Advanced Data Services add-on.

Spotfire® Enterprise Data Streams

For organizations requiring real-time insights, Spotfire® Enterprise Data Streams provides the ability to monitor and analyze live data. From industrial sensors to financial market feeds, real-time data visualization enables faster, more informed decisions:

- **Real-time data ingestion:** Connect to multiple streaming data sources and develop insights as data is generated.
- **Live data visualization:** Visualize data in motion, identify trends, and respond to changing conditions in real time.
- **Data enrichment:** Apply transformations and enrich data streams for deeper insights.
- **Alerts and notifications:** Configure alerts to monitor for anomalies and trigger responses to critical events.

Provide a competitive edge by monitoring trends, detecting anomalies, and tracking key performance indicators as they evolve with the Spotfire® Enterprise Data Streams add-on.

Trusted across industries

Spotfire Enterprise continues to be trusted across industries to solve complex challenges and accelerate data-driven outcomes notably, and not limited to:

High-tech manufacturing

Monitor production processes in real-time, detect anomalies, and minimize downtime. Leverage historical data alongside live sensor data to optimize operations.

Energy

Analyze sensor data from pipelines, oil rigs, and grids to predict failures and ensure operational safety.

Life sciences

Streamline drug discovery by analyzing laboratory data in real time, accelerating research and development.

Financial services

Monitor market data to detect fraud, identify trading opportunities, and manage risk.

Share your analyses

Now available, Spotfire Enterprise with External Consumers enables you to share Spotfire analyses beyond your organization securely. Providing the same capabilities as Spotfire Enterprise, with the added rights to extend insights to customers, partners, and vendors, this offering is designed to enable organizations that need to collaborate externally. This ensures governed, scalable, and seamless access to Spotfire analyses across your entire ecosystem.

Get started today

Spotfire Enterprise offers unparalleled value by combining advanced analytics, interactive visualizations, automation, and governance in one powerful, scalable platform. With the platform, you can:

- Unify and virtualize data
- Ensure secure collaboration
- Deliver real-time insights
- Make faster, smarter decisions
- Meet evolving business needs
- Unlock the full potential of your enterprise data

Take your visual data science initiatives to the next level with Spotfire Enterprise.
