

Win the race to insight with TIBCO Hyperconverged Analytics

The quicker you get from event to insight, the better your business outcomes. Accelerate your time to insight with TIBCO hyperconverged analytics powered by Amazon Web Services (AWS). Built on a winning combination of visual analytics, business intelligence, and data science, hyperconverged analytics helps you overcome hurdles, outpace the competition, and build a faster, smarter business.

HURDLE

Siloed data sources and disparate systems

Hyperconverged analytics seamlessly connects all your data sources and systems to give you the whole picture.

IDC survey reveals top data and analytics challenges¹:

- Too much data to deal with
- Lack of access to the right tools
- Inability to turn data into actionable information

HURDLE

Multiple complex analytics tools

Hyperconverged analytics brings all your analytics tools together in one single, easy-to-use platform.

HURDLE

Lag between business event and business action

Hyperconverged analytics works in real time to generate and share actionable insights throughout your organization.

TIBCO Hyperconverged Analytics brings together market-leading visual analytics, data science, and streaming analytics capabilities in a seamless experience to empower enterprises with the ability to predict and act on high-value opportunities in real time.

With the immersive, smart, and real-time capabilities of TIBCO Hyperconverged Analytics, you'll win the race to insight by shortening the time from business event to action.
